

PRESERVED LICHEN / REINDEER MOSS

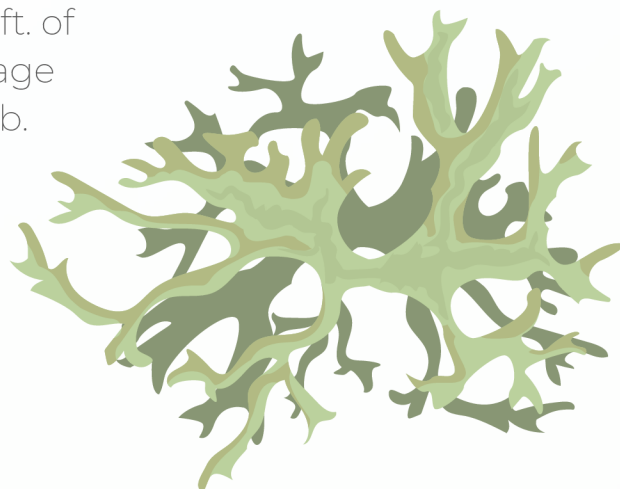

UpScaper's preserved moss walls use only sustainably sourced U.S. moss varieties. Each species is harvested from the hills of North Carolina and preserved in the strictest measures to ensure longevity and beauty.

Moss adds texture, decadence and flare to projects and is a great element to include to mix up a property with multiple biophilic design types.

Technical Specifications		
Dimensions Depth	1.5"	up to 3"
Weight	1.75 sq. ft. coverage per lb.	
Distribution	1"-3" clusters	
Plant Type	Cladina arbuscula stellaris	
Color	12 available colors	
Packaging	5lb increments	
Active Chemistry	Proprietary Titanium Phosphate-Based Compound & Water.	
Backing	no backing - glued to substrate	
Hypo Allergenic	Salt preservation process	
Fire Classification	NS-EN ISO 11925-1:2010 - Zero ignition - Pass	

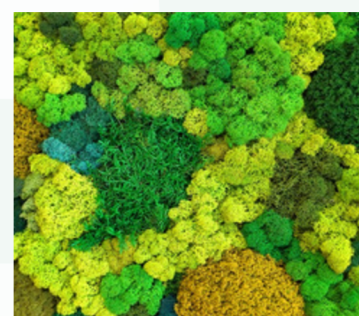

- Uses sustainably sourced U.S. moss varieties.
- Harvested from North Carolina with strict preservation measures.
- Adds texture, decadence, and flare to projects.
- Ideal for incorporating biophilic design elements.

1.5"-3" relief
1.75 sq. ft. of coverage per lb.

COMMON APPLICATIONS

- General Beautification
- Signage
- Biophilic Design Benefits
- Privacy Screening
- Visual Screening
- Spatial Unity
- Concrete Softening
- Acoustic Outcomes
- Preserved Moss Roofs
