

ALL-WEATHER FAUX PLANT WALL COVERING: BOXWOOD

This all-weather panel was designed engineered to recreate a beautiful natural aesthetic even in the most inhospitable of locations with a small allocation of 'planting overlap' that allow for seamless installation of multiple panels. The top overlap is slightly greater than the bottom one whereas the side overlaps are the same. The overlap also serves to disguise the grid that holds the plants.

Technical Specifications		
Dimensions (WxL) Depth	31.5"x31.5"	up to 8"
Weight	13.2 lbs	
Distribution	Thick Multi-Dimensional Plantings	
Plants	Faux plants dispersed among three SS panels fastened with 1.55 mm SS wire	
Color	Mixed	
Coverage	6.89 sq. ft.	
Stainless Steel Frame	8 gauge Coated, 2" Square SS Mesh Grid	
SS Frame Coating	Powder Coating Green	
Plant Ties	1.mm SS wire	
Color	Varied	
UV	ASTM G154 AATCC 16.3	
Fire Testing	NFPA 701, ASTM E84, NFPA 286	
Heat Build Up	31.7° C	
Freeze/Thaw	MIL-STD-810G Method 524	
Packing	Box of 4 Panels - Identical	
Airflow	< 25%	
Anchors	Variable based on substrate - see manufacturer's recommended installation instructions.	

31.5" square
13.2 lbs

ENGINEERED FOR

- General Beautification
- Biophilic Design Benefits
- Privacy Screening
- Visual Screening
- Wind Breaks
- Spatial Unity
- Concrete Softening
- Acoustic Outcomes
- Artificial Green Roofs
