

In our experience, we have found the following plants to work well on our Indoor Greenwalls. The plants listed below are examples of plants we recommend for best results.

It is important when selecting plants, to ensure that you choose plants with similar watering and lighting needs. Select a combination of 4 inch or 6 inch plants to ensure a full, instant effect.

We've sorted the plants by categories:

- Base Greens: Plants that are great bases for your greenwall. They are reliable, full and lush.
- Dark Variegation: Plants with darker colors in the leaves.
- Light Variegation: Plants with lighter colors in the leaves.
- Colorful: Plants with bright colors or pops of colors.
- Texture: Plants with varied textures.
